● ABOUT ME

Polychronis Kostoulas (PK) has a core expertise in **Public Health Epidemiology**. His primary research interest is in the development and application of Bayesian methods and deep learning algorithms for the evaluation of diagnostic tests, estimation of true disease prevalence, proof of disease freedom and early warning systems for epidemics. PK has **over 100 publications** in peer-reviewed journals ([Google Scholar profile](#)) and has participated in **18 international research projects, leading four (4) and coordinating and leading the other two (2)**.

He is also Member of the Executive Board of ASPHER and EiC of PVM (Elsevier).

Below are listed only relevant research projects that I lead/led in the past four years and only selected publications since 2021.

● WORK EXPERIENCE

1 JAN 2021 – CURRENT Greece

ASSOCIATE PROFESSOR OF EPIDEMIOLOGY UNIVERSITY OF THESSALY

● EDUCATION AND TRAINING

SEP 2021 – 20 APR 2022 Washington DC, United States

SCHOLAR OF THE ACADEMIC PUBLIC HEALTH LEADERSHIP INSTITUTE Association of Schools and Programs of Public Health (ASPPH) & Center of Creative Leadership (CCL)

Website <https://aspph.org>

1 OCT 2002 – 1 APR 2006 Greece

PH.D. IN EPIDEMIOLOGY University of Thessaly

● ADDITIONAL INFORMATION

NETWORKS AND MEMBERSHIPS

2022 – CURRENT

Member of the Executive Board of ASPHER

PROJECTS

OCT 2019 – APR 2024

Novel tools for test evaluation and disease prevalence estimation H2020 - COST Action
Main proposer, Coordinator and Chair
